

GEOG 595: SC State Climatology Office Internship

Gain valuable
outside-the-
classroom
experience
while earning
class credit!

Description

The South Carolina State Climatology Office is funded under the South Carolina Department of Natural Resources. An internship in the office promotes the development of professional workplace communication and critical thinking skills, and the ability to work independently to conduct research projects. An ideal candidate would be proactive, self-sufficient, and interested in the natural resources and climate of South Carolina. GIS and computer programming skills are preferable.

Make updates to climate
office website materials
and reports.

Responsibilities

Assist in office research regarding the following topics:

- Precipitation Trends
- Temperature Trends
- Hurricane Climatology
- Severe Weather
- Drought
- Flooding
- Monthly SC Weather Reviews
- GIS Visuals

Use various online resources
to compile weather and
climate data requested by
South Carolina residents and
stakeholders.
