

Awards and Scholarships Application Form

The awards and scholarships offered by the Department of Mathematics are awarded to USC students majoring in mathematics. Recipients are selected from students with a record of excellence in 500-level math courses at USC. All decisions will be made by the faculty members on the Department of Mathematics Undergraduate Program Committee. While not required, interested students are encouraged to complete this application form. All decisions will be announced and awarded at the Undergraduate Awards Day in the Spring semester.

Both graduating and returning students are eligible for the awards. Only returning students are eligible for the scholarships. The Laurie Undergraduate Research Scholarship is divided among all terms that the student is registered for courses during the research period. All other scholarships are divided equally between the Fall and Spring semesters of the next academic year.

Victor W. Laurie Undergraduate Research Scholarship Proposal

Student's Name _____

USC Email Address _____

Telephone number (local) _____

The Victor W. Laurie Undergraduate Research Scholarship provides monetary support up to \$1,000 for an undergraduate student interested in being involved with mathematical research. This is a competitive award based on proposals submitted by all interested students.

The proposal should explain the basic mathematical theme to be studied, why this topic is of interest to you, any prior knowledge you have about this project (courses and/or independent study), and anticipated results. The proposal doesn't need to have great mathematical detail, but needs to give a clear description of the specific focus of this project. The entire proposal should be no more than two (2) pages — this paper and one additional page.

Students interested in the Laurie Scholarship are encouraged to apply to USC's Magellan Scholarship as well. For more details about the Magellan Scholar Program and other opportunities for undergraduate research at USC, visit <http://www.sc.edu/our>

Proposed Project Title: _____

Proposed Project Start and End Dates: _____

Research Supervisor (printed) _____

(signed) _____
