RESEARCH AND TEACHING INTERESTS

As a health psychologist and a social and behavioral scientist, I study biopsychosocial aspects of health, with a focus on improving ‘real-world’ prevention and treatment systems. I direct the *Healthy Futures Lab* (<http://www.healthyfutureslab.com>) where I lead community-engaged research to help people—particularly those from marginalized communities—achieve optimal health and wellbeing. Specific research interests include:

- mobile Health (mHealth) interventions for youth living with HIV
- Barriers to scaling up Pre-Exposure Prophylaxis (PrEP) in the southern US
- Resilience-based child and family interventions
- Impacts of stigma on health and mental health
- Building capacity for integrated behavioral healthcare
- Improving prevention and treatment of HIV, STIs, and substance use disorder
